SERVICES AND PRODUCTS

Being a multi-disciplinary consultant supplier of Agricultural Irrigation materials, installation, the Company offers a wide range of Agricultural support materials and Project Management services. We focus on various aspects of Agricultural projects Infrastructure planning and development namely:

I. **Water Management, Irrigation and Drainage Engineering and Material Supply:**

The Company has over the years handled a number irrigation projects in a number of regions. With years of expertise in the field of Drip Irrigation the Company offers tailor made solution to a wide array of irrigation needs by using technologies that give precise water coverage, even with low volumes of water. We offer water treatment, filtration, pumping equipment and high quality durable pipes to help secure your water supply. The Company guides and implements all irrigation and water supply projects, whether it is for irrigation, potable water for towns and communities, municipal services, or pumping and control systems, as well as removal and treatment of waste water. The Company deals in well-known and trusted brands throughout the world with vast range of innovative irrigation methods that fit the growing needs of water saving and modern products for agriculture and gardening. We install and maintain drip lines, sprinklers (micro-sprinklers, micro-jets, rain guns) and center pivot, and offer irrigation solutions used for various

crops such as fruits, vegetables, flowers and trees, combining the advantage of low water volume and precision coverage.

2. Dam liner installation

Dam Liner is the kind of HDPE geomembrane liner which is the cost effective solution to prevent water leakage when you build irrigation pond for crops, support aquaculture or provide water for livestock. The thickness of farm dam liners should be determined according to the bearing water pressure.

We supply and installing liner 1.5mm, 1mm and 0.5mm.

4. Agronomy consultancy

We offer agricultural consulting services including collect data and consults with farmers optimize soil fertility, the best choice of seeds, identify and control pests and deceases and help them grow better crops so as to create a modern and competitive business on the market and to obtain additional profit and reduce costs in crops production.

5. Fish farming projects

We supply fish fingerlings, fish pellets water testing and building fish ponds cages.

6. Bee keeping projects

Supplying beehives, beehive tools and beekeeping training.

7. Greenhouse Installation

The company sells and installs greenhouses, polythene sheets, insect nets and greenhouse profiles. We design affordable greenhouse structures for small, medium and large scale farmers. Our reputation is built on structures of uncompromising quality and the best customer service in the industry. Our greenhouse is of high quality greenhouses which maximize crop production and optimize profits. Our broad range of products uses cutting edge technology in heating and cooling to plant movement and automation in our design. Our energy efficient greenhouses will use coverings and ventilation methods to give you the most economical growing environment in the industry.
